OCTOBER 23, 2017 AIR QUALITY TEST RESULTS

The Board is releasing the attached Air Quality Test Results for Central Elementary/Middle School, Elizabeth Haddon Elementary, Tatem Elementary, and Haddonfield High School. The tests indicate that all of our schools exceeded expectations with regard to the safety of the air quality. The tests revealed that all samples, as all schools were below the method detection limit. While there has not yet been a cause for concern as it relates to air quality in the schools, the Board believes it is important to continue to monitor the air quality periodically ensure the health and safety of the staff and students throughout the construction process.

Please forward any questions regarding the air quality to Dr. Richard P. Perry at rperry@haddonfield.k12.us

Thank you to all our staff and students for their continued patience and cooperation throughout the construction process.
