

A New Health Resource for Haddonfield Families, Students and Staff

Because we are committed to the well-being of our school community, Haddonfield School District has partnered with Care Solace to better connect students, staff, and families to mental health and substance abuse treatment options.

Care Solace will connect you quickly and confidentially to mental health and substance abuse providers that match your needs, regardless of insurance. Their Care Companion team is available 24/7/365 to help you connect with verified providers in our area, making phone calls on your behalf to find and book appointments.

You* may call 888-515-0595 and speak to a Care Companion to find the best option, or You may go online for an anonymous search of possible providers.

Also, you may contact your building principal, school nurse or school counselor for a “warm handoff.” In a warm handoff, the school staff person shares your basic contact information with Care Solace so they can help you find a provider that fits your needs.

Care Solace is optional and is provided at no cost to you by Haddonfield School District. It is not an emergency response service and does not replace calling 911.

Connect to care today. Call 888-515-0595 or go to the [Care Match site here](#).

** Students age 16 and older may access these services independently.*
